

The Weymouth Compressor Site needs to be closed down due to the threat to public health that it poses during this time of COVID-19. We need our entire community to respect the guidelines in order to protect our community from this disease. Many of our leader have closed construction sites in the interest of peoples' health in other areas and we hope you will also recognize the need to end work at his time at the Weymouth Compressor. The CDC and OSHA may supply you with important information on behalf of our at risk citizens. There is no need for this compressor in our area and it is a Canadian company that will gain from this endeavor. We , here in Weymouth, Quincy, Braintree, Massachusetts will only endure the negative, harmful aspects, disease and dangerous air quality from this project. Please help our citizens by closing down this construction project.

Thank You,
Yvonne Lamothe and Family
25 Jordan Street and 11 Allerton Street
Quincy, MA 02169
