Community Center,
Quincy

June 6

7:00 - 9:00PM

Fore River
Clubhouse, Quincy

Are you a long-time resident of the Fore River Basin?

Have you or your family experienced health-related issues potentially as a result of exposure to pollution in the community?

Do you feel comfortable sharing your story?

FRRACS is seeking health-related stories for a documentary film project as part of the fight against the Weymouth compressor station.

Attend one of our community meetings to learn more about the project, and to share your story.

This project is supported by a grant from The Island Foundation
